

Ali Tadayoni

Frontend Developer

Tehran | tadayoni.ali.enayat@gmail.com | +98 990 489 8144 | [LinkedIn](#) | [Github](#) | [website](#)

Summary

Frontend Developer with 2+ years of experience building SaaS products, cloud platforms, and customer-facing applications. Skilled in **React**, **Next.js**, **Vue.js**, **Nuxt.js**, and **TypeScript**, with experience in frontend architecture, **Vue.js-to-React migrations**, performance optimization, and production-grade testing across high-impact user workflows. Actively leverages AI development tools, including Claude, Cursor, and Copilot, to accelerate engineering processes. An energetic, collaborative engineer in cross-functional teams, with strong attention to detail and a commitment to continuous technical growth.

Professional Experience

Frontend Developer | [abrNOC](#) (Cloudzy)

Cloud infrastructure & VPS provider — Oct 2024 – Present

- Contributed to the **migration** of Cloudzy's admin and customer panels from **Vue.js** to a centralized **Nx monorepo** using **React**, **TypeScript**, and MUI, enabling code sharing across applications and reducing duplicated frontend development efforts.
- Engineered **automated E2E testing** for **40+ critical user journeys** using **Cypress**, integrating **CI/CD pipelines** with daily execution and Telegram/email alerts, reducing manual QA effort and improving release confidence.
- Maintained and optimized legacy **Vue 2** control panels serving **200k+ active users**, supporting critical workflows.
- Led frontend implementation of a **subscription-based billing platform** alongside the existing Pay-As-You-Go model, enabling **recurring subscription purchases** and expanding Cloudzy's monetization model.
- Reduced VPS Creation page load time by **20%** via **API request optimization** and **caching**, improving workflow speed.
- Redesigned **150+ SEO-driven landing pages** in collaboration with design and SEO teams, strengthening **accessibility standards**, modernizing the user experience, and establishing a **consistent design system** across the website.
- Developed internal **operational dashboards** and **infrastructure management tools** used by support and infrastructure teams to monitor services, manage resources, and streamline daily workflows.
- Built a **real-time VPS monitoring dashboard** displaying **CPU, RAM, disk I/O, and network metrics** through live charts and streaming telemetry data, including dynamic feature availability and pricing logic integrated into the VPS creation workflow.
- Implemented a **secure "Pay Without Login"** flow using **one-time temporary links** and **end-to-end payment status tracking**.

Technical Skills

- Languages:** TypeScript, JavaScript
- Frameworks:** React.js, Next.js (SSR/SSG), Vue.js (2 & 3), Nuxt.js
- State Management:** Zustand, Redux, Vuex, TanStack Query, Pinia, Context API
- UI & Visualization:** MUI, Vuetify, Tailwind CSS, Styled Components, Sass, Recharts, Chart.js, Leaflet
- Testing:** Playwright, Cypress, Jest, Vitest, React Testing Library
- Build & Workflow:** Vite, Webpack, Docker, Monorepos (Nx & Turborepo), Git, CI/CD, Agile
- Backend:** Node.js, Express.js, PostgreSQL, MongoDB, RESTful APIs, Swagger

Projects

Cloudzy Testing Platform | [Project Details](#)

Engineered an end-to-end testing platform featuring categorized test execution, scheduling, tagging, monitoring, debugging, and platform health analytics through a unified administrative dashboard.

Cloudzy Growth Platform | [Project Details](#)

Built Cloudzy's Loyalty and Referral platforms by implementing tier-based rewards, badges, wallet credits, automated progression, referral attribution, fraud prevention, configurable business rules, and administrative management tools.

The Wild Oasis Platform | [Live Customer](#) | [Live Admin](#)

Full-stack hotel booking platform built with React and Next.js, comprising an admin dashboard and customer-facing website featuring authentication, role-based access, reservations, analytics, and real-time synchronization via Supabase.

Bonmano Coffee Shop | [Live Demo](#)

Responsive landing page built with Tailwind CSS, integrating dark mode support and interactive Swiper-powered sliders.

Education & Languages

Bachelor of Computer Engineering | Islamic Azad University Of Karaj, Iran

Languages: English – Professional working proficiency
